GOVERNMENT OF INDIA

Shri Narendra Modi

Hon'ble Prime Minister of India

Message

Greetings to Yoga lovers all over the world. Yoga is one of the most precious gifts given by the ancient Indian sages to humankind. It is said in the Bhagavad Gita, “समत्वं योग उच्यते”. It means “Yoga is a state of equilibrium and equanimity”.

Yoga is not just a set of exercises that keeps the body fit. It is a passport to health assurance, a key to fitness and wellness. Yoga is not only what we practice in the morning. Doing our day-to-day activities with diligence and complete awareness is Yoga as well! **Free from illness, a path to wellness-that is the path of Yoga.**

Because it teaches us to see others the same as ourselves, Yoga makes us better individuals in thought, action, knowledge and devotion. Yoga achieves **oneness through oneness**. It brings about oneness among the mind, body and intellect. We begin to understand ourselves much better, which also makes us understand others better.

When we understand ourselves, we become ready to form a constructive bond with the society at large. A bond of oneness with our families, with the society we live in, with fellow humans, with all the birds, animals and trees with whom we share our beautiful planet. Thus, **Yoga is the journey from 'me' to 'we'**. The

problems of modern lifestyles are well known. We have found ways to control communicable diseases, but the focus is now shifting to dealing with non-communicable, lifestyle diseases. People suffer from stress related ailments and also lifestyle related diseases like diabetes and hyper-tension. **Stress and Depression have become silent killers. Yoga offers a solution to these ailments.** Practicing Yoga helps fight stress and find peace. If the body is a temple of the mind, Yoga creates a beautiful temple.

Yoga is ideal for relaxation. Many times when you are tired, a cool shower refreshes you. In the same way, practicing Yoga will truly relax the mind and body. Yoga goes beyond boundaries of age, gender, caste, creed, religion and nations. Yoga doesn't discriminate between anybody. All you need is willingness to practice it.

In a world of excess, Yoga promises restraint and balance.

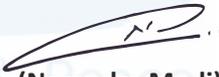

In a world suffering from mental stress, Yoga promises calm.

In a distracted world, Yoga helps focus, boosts concentration.

In a world of fear, Yoga promises hope, strength and courage.

Yoga gives peace of mind. People who are at peace with themselves are at peace with others too. Such people build harmonious nations. Such nations build a harmonious world. I am happy that the popularity of Yoga is on the rise globally. With more people embracing Yoga, the demand for Yoga teachers is also rising. Our next challenge is to produce institutionally trained Yoga teachers who can ignite this flame further, especially among the youth.

I wish you all Happy Yoga practicing!

Today, as the importance of Yoga in every aspects of life is realized, more students and practitioners of Yoga are looking for deeper understanding and philosophical bases of Yoga and its practices. Common Yoga Protocol is an humble effort to show how can Yoga influence our life, attitudes and well-being. This invariably leads us to the very heart and soul of Yoga.

What is Yoga?

Yoga is essentially a spiritual discipline based on an extremely subtle science which focuses on bringing harmony between mind and body. It is an art and science for healthy living. The word "Yoga" is derived from the Sanskrit root '**yuj**' meaning "to join", "to yoke" or "to unite". According to Yogic scriptures, the practice of Yoga leads to the union of an individual consciousness with the universal consciousness. According to modern scientists, everything in the universe is just a manifestation of the same quantum firmament. One who experiences this oneness of existence is said to be "in Yoga" and is termed as a yogi who has attained a state of freedom, referred to as *mukti, nirvāna, kaivalya or mokṣa*.

"Yoga" also refers to an inner science comprising of a variety of methods through which human beings can achieve union between the body and mind to attain self-realisation. The aim of Yoga practice (*sādhana*) is to overcome all kinds of sufferings that lead to a sense of freedom in every walk of life with holistic health, happiness and harmony.

Brief history and development of Yoga

The science of Yoga has its origin thousands of years ago, long before the first religion or belief systems were born. The seers and sages carried this powerful Yogic science to different parts of the world including Asia, the Middle East, northern Africa and South America. Interestingly, modern scholars have noted and marvelled at the close parallels found between ancient cultures across the globe. However, it was in India that the Yogic system found its fullest expression. Agastya, the saptarishi, who travelled across the Indian subcontinent, crafted this culture around a core Yogic way of life.

Yoga is widely considered as an "immortal cultural outcome" of

the Indus Saraswati Valley Civilisation - dating back to 2700 BC - and has proven itself to cater to both material and spiritual upliftment of humanity. A number of seals and fossil remains of Indus Saraswati Valley Civilisation with Yogic motifs and figures performing *Yoga sādhana* suggest the presence of Yoga in ancient India. The seals and idols of mother Goddess are suggestive of *Tantra* Yoga. The presence of Yoga is also available in folk traditions, Vedic and Upanishadic heritage, Buddhist and Jain traditions, *Darshanas*, epics of *Mahabharata* including *Bhagawadgita* and *Ramayana*, theistic traditions of *Shaivas*, *Vaishnavas* and *Tantric* traditions. Though Yoga was being practiced in the pre-Vedic period, the great sage Maharishi Patanjali systematised and codified the then existing Yogic practices, its meaning and its related knowledge through Patanjali's *Yoga Sutras*.

After Patanjali, many sages and Yoga masters contributed greatly for the preservation and development of the field through well documented practices and literature. Yoga has spread all over the world by the teachings of eminent Yoga masters from ancient times to the present date. Today, everybody has conviction about Yoga practices towards prevention of diseases, and promotion of health. Millions of people across the globe have benefitted by the practice of Yoga and the practice of Yoga is blossoming and growing more vibrant with each passing day.

The Fundamentals of Yoga

Yoga works on the level of one's body, mind, emotion and energy. This has given rise to four broad classifications of Yoga: *Karma Yoga* where we utilise the body; *Jñāna Yoga* where we utilise the lighter mind; *Bhakti Yoga* where we utilise the emotion and *Kriyā Yoga* where we utilise the energy. Each system of Yoga we practice falls within the gamut of one or more of these categories.

Every individual is a unique combination of these four factors. Only a *Guru* (teacher) can advocate the appropriate combination of the four fundamental paths as it is necessary for each seeker. All ancient commentaries on Yoga have stressed that it is essential to work under the direction of a *Guru*.

Traditional schools of Yoga

The different philosophies, traditions, lineages and *Guru-shishya paramparas* of Yoga led to the emergence of different traditional schools. These include *Jñāna Yoga*, *Bhakti Yoga*, *Karma Yoga*, *Pātañjala Yoga*, *Kuṇḍalini Yoga*, *Haṭha Yoga*, *Dhyāna Yoga*, *Mantra Yoga*, *Laya Yoga*, *Rāja Yoga*, *Jain Yoga*, *Bouddha Yoga* etc. Each school has its own approach and practices that lead to the ultimate aim and objectives of Yoga.

Yogic practices for health and wellness

The widely practiced Yoga sadhanas are: *Yama*, *Niyama*, *Āsana*, *Prāṇāyāma*, *Pratyāhāra*, *Dhāraṇā*, *Dhyāna*, *Samādhi*, *Bandhās* and *Mudrās*, *Ṣaṭkarmas*, *Yuktāhāra*, *Mantra-japa*, *Yukta-karma* etc.

Yamas are restraints and *Niyamas* are observances. These are considered to be pre-requisites for further Yoga practice. *Āsanas*, capable of bringing about stability of body and mind, "*kuryat-tadāsanam- sthairyam*", involve adopting various psycho-physical body patterns and giving one an ability to maintain a body position (a stable awareness of one's structural existence) for a considerable length of time.

Prāṇāyāma consists of developing awareness of one's breathing followed by willful regulation of respiration as the functional or vital basis of one's existence. It helps in developing awareness of one's mind and helps to establish control over the mind. In the initial stages, this is done by developing awareness of the "flow of

in-breath and out-breath" (*śvāsa-praśvāsa*) through nostrils, mouth and other body openings, its internal and external pathways and destinations. Later, this phenomenon is modified, through regulated, controlled and monitored inhalation (*śvāsa*) leading to the awareness of the body space getting filled (*pūraka*), the space(s) remaining in a filled state (*kumbhaka*), and it getting emptied (*recaka*) during regulated, controlled and monitored exhalation(*praśvāsa*).

Pratyāhāra indicates dissociation of one's consciousness (withdrawal) from the sense organs which connect with the external objects. *Dhāranā* indicates broad based field of attention (inside the body and mind) which is usually understood as concentration. *Dhyāna* (meditation) is contemplation (focused attention inside the body and mind) and *Samādhi* (being constant).

Bandhas and *Mūdras* are practices associated with *Prāṇāyāma*. They are viewed as the higher yogic practices that mainly adopt certain physical gestures along with control over respiration. This further facilitates control over mind and paves the way for a higher Yogic attainment. However, practice of *dhyāna*, which moves one towards self-realisation and leads one to transcendence, is considered the essence of *Yoga Sādhana*.

Ṣaṭkarmas are detoxification procedures that are clinical in nature and help to remove the toxins accumulated in the body. *Yuktāhāra* advocates appropriate food and food habits for healthy living.

Mantra Japa: Japa is the meditative repetitions of a mantra or a divine consciousness. Mantra Japa produce positive mental tracts, helping us to gradually overcome stress.

Yukta-karma advocates right karmas or actions for a healthy living.

Yoga for Harmony & Peace

International Day of Yoga

Yoga Geet (Yoga Song)

तन मन जीवन चलो संवारें
योग मार्ग अपनाएँ,
वैर भाव को त्याग सभी हम
गीत मिलन के गायें।

आनंदमय हो जीवन सबका
योग यही सिखलाये
हों तनाव भयमुक्त सभी जन
दिव्य प्रेम सरसाये।

यम और नियम हमारे सम्बल
सुखमय जगत बनाएँ,
आसन प्राणायाम ध्यान से
स्वास्थ्य शांति सब पाएँ!

ऊर्जावान बने सब साधक
संशय सभी मिटायें
विश्व एक परिवार योग कर
स्वर्ग धरा पर लाएँ।”
